WORK EXPERIENCE

Digital Illustrator, *Freelance*   Aug 2015 – Feb 2022

- Developed art for more than 100 clients for projects, including books and table-top game characters
- Utilized creativity and artistic skills to produce engaging and visually compelling illustrations
- Maintained excellent project management and flexibility to meet deadlines while ensuring high-quality work
- Worked independently as a booth artist at media events, communicating with customers in a friendly manner

Mentorship

Full Stack Developer Mentee, *The Collab Lab*   Jan 2023 – Mar 2023

Built web app Knead To Buy

- Demonstrated strong teamwork skills by actively pair programming and working on over 20 user stories
- Exhibited excellent written communication in detailed Github pull requests for proposed app changes
- Provided feedback through code reviews to guarantee the success of team project
- Displayed strong verbal communication skills when demoing features in production during weekly meetings
- Showed effective problem-solving by identifying, researching and troubleshooting issues during development

Volunteering

Web Developer, *Code For America | Hack For LA*   Mar 2023 – Present

Contributing to open-source maintenance of the Hack For LA website by solving and documenting changes in pull requests, effectively reviewing other developers' code, and providing constructive feedback.

PROJECTS

Knead To Buy [GitHub] | [Live]

A "smart" full stack web app for shoppers who want to keep track of things they buy and remember how soon they need to buy them again. Developed with four other developers in a collaborative setting. Built with **JavaScript**, **React**, HTML/CSS, and **Google Firebase**. Hosted in Firestore.

Nekkoh [GitHub] | [Live]

A full stack web app for pet owners/lovers who want to share photos of their fur friends. Built with **JavaScript**, **React,** HTML/CSS, **REST APIs**, and **PostgreSQL**. Cloud storage configured with AWS S3 and deployed on Dokku.
